Legacy of Innovation
In 1902, Willis Carrier solved one of mankind’s most elusive challenges by controlling the indoor environment through modern air conditioning. His invention enabled countless industries, promoting global productivity, health and personal comfort.

Products & Services
Carrier delivers global solutions across a broad range of applications in heating, air conditioning, refrigeration and beyond.

- **Home Comfort** – Millions of people trust Carrier’s leadership and expertise in delivering efficient solutions for their home comfort needs.
- **Building Solutions** – Setting the standard for performance, energy efficiency and sustainability, Carrier offers solutions in air conditioning, building controls and energy services.
- **Transport Refrigeration** – Carrier transport refrigeration equipment, cold chain monitoring solutions and replacement components ensure the safe, reliable transport of food and beverages, medical supplies and other perishable cargo to people and businesses around the world.
- **Commercial Refrigeration** – Serving the food service and food retail industries, our refrigeration solutions are built on next-generation technologies to preserve freshness, ensure safety and enhance appearances of global food and beverage retail.

Parent Company
Carrier is a part of UTC Climate, Controls & Security, a leading provider of heating, ventilating, air-conditioning and refrigeration systems, building controls and automation, and fire and security systems.

- 51 factories
- 39 research & design centers
- 55,000 employees
- Serving customers in more than 180 countries

Sustainability
Our environmental commitment extends well beyond our walls to the communities we call home and the customers we support. UTC Climate, Controls & Security is the only company in the world to be a founding member of the U.S., Argentina, China, India, France, Kuwait, Singapore and South Africa Green Building Councils. In fact, Carrier was founding company No. 1 of the U.S. Green Building Council® (USGBC) in 1993.

Carrier is committed to reducing the greenhouse gas impact of our products through energy efficiency advancements and the refrigerants we use. Since 1994, we have led the industry in the phase-out of ozone-depleting refrigerants while introducing many of the world’s most energy-efficient heating, air-conditioning and refrigeration systems. At the same time, we’ve reduced the environmental impact of our operations.

Landmark Installations
- **The Sistine Chapel** – Vatican City
- **Singapore Expo, Asia’s largest exhibition center** – Singapore
- **The Great Hall of the People** – Beijing, China
